Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to merely generating a file containing data and therefore provide any tangible results.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,4-15,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Finger or Mortimore et al. Mortimore et al discloses a method for generating a DICOM compatible file where the quantitative data is considered to be placed in a field other than an image field. It should be noted that applicant states that DICOM is the standard used in the industry to communicate medical files in electronic form. Mortimore et al disclose the use of a DICOM compatible file, see column 3, line 52, column 4, lines 39-41, column 5, line 28. Finger discloses a method for generating a DICOM compatible file where the quantitative data is considered to be placed in a field other than an image field. It should be noted that applicant states that DICOM is the standard used in the industry to communicate medical files in electronic form. Finger discloses the use of a DICOM compatible file, see column 22, lines 47-50. The use of a bone densitometer to provide a bone scan and its related data is old and well known, as disclosed by applicant. It would have been obvious to one skilled in the art to have modified Finger or Mortimore such that the image data provided is provided by a bone densitometer and the quantitative data being related to the bone scan. Such a modification merely involves the substitution of one known type of scan for another.

Response to Arguments

Applicant's arguments filed June 27, 2005 have been fully considered but they are not persuasive. Applicant's remarks are noted, however, the rejection of claims 1-17 stands in view of the teachings of Mortimore et al and Finger which each discloses the use of a DICOM compatible file as discussed above. Applicant's remarks are not fully understood and the claims still appear to read on the prior art of record.

Allowable Subject Matter

Claims 23-27 are allowable over the prior art of record.
